National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Introduction

Definition/Description of training program (Assistant Technician)

Mining sector is one of the booming industries of Pakistan. There is an increasing demand of the Junior Technician. Therefore, the skills are required to be inducted in the future generation. If an individual is planning to pursue a career in mining, this program will be helpful in targeting various commercial and non-commercial projects etc. If an individual is planning to take up Assistant Technician course, this course will help him weigh their choices better.

Keeping in view of the above the competency based national vocational qualifications have been developed by NAVTTTC to train the unskilled human resource on the technical and entrepreneurial skills to be employed / self-employed and inevitably set sustainable impact on their lives by increasing their livelihood income.

Training Course is based on competency standards which are defined by the industry and the traditional role of a trainer changes and shifts towards the facilitation of training. A trainer encourages and assists trainees to learn for themselves. Trainees are likely to work in groups (pairs) and all doing something different. Some are doing practical tasks in the workshop, some writing, some not even in the classroom or workshop but in another part of the building using special equipment. As trainees learn at different pace they might be at different stages in their learning, thus learning must be tailored to suit individual needs. The following facilitation methods (teaching strategies) are generally employed.

Purpose of the training program:

The purpose of the training is to provide skilled manpower to improve the existing construction industry. More than 96 % of the Pakistani manpower is working in GCC countries where Saudi Arabia (50.90%) and UAE (33.10%) are the largest destination countries followed by Oman (7.26%), Kuwait (1.90%), Bahrain (1.58%), and Qatar (1.41%). The overseas Pakistanis are playing a pivotal role to support the economy in the form of remittances. According to new labor laws, a large number of skilled labors is demanded by Saudi Government especially for the construction sector. For this purpose, new qualifications have been developed by NAVTTTC on CBT&A mode in order to train the unskilled human resource

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

with employable skills and cater the demand of Saudi Government. Moreover, the availability of skilled professionals will bring socio-economic benefits to all stakeholders.

Overall objectives of training program:

The main objectives of the National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician) are as follows:

- Improve the professional competence of mining process
- Capacitate the local community and trainers in modern CBT training, methodologies and processes as envisaged under NVQF
- Provide flexible pathways and progressions in the mining sector
- Enable the trainees to perform their duties in efficient manner
- Establish a standardized and sustainable system of training for Mining Process technology across globe

Competencies to be gained after completion of course:

At the end of the course, the trainee has attained the following core competencies:

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

1. Follow Safety Rules at Site
2. Perform Basic Communication Skills
3. Demonstrate Basic Numeracy Skills
4. Perform Basic Technical Drawings

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

5. Perform Basic Bench Work Operations
6. Interpret Topographic Map
7. Interpret Geological Map
8. Interpret Mineral Map
9. Perform Basic Electricity Applications
10. Perform Safe Handling of Explosive Material

Possible available job opportunities, available immediately and later in the future:

Possible Career paths

- Assistant Technician
- Technician
- Senior Technician/Shot firer
- Supervisor

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Trainee entry level:

The entry level for National Vocational Certificate Level 2 in Construction Sector (**Assistant Technician**) is given below:

Title	Entry requirements
National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)	The entry requirement for this qualification would be Middle or equivalent

Minimum qualification of trainer:

- A. DAE (in relevant field) with Min 02 Year Industrial / Teaching Experience (IT and Computer Skills will be preferred)
- OR**
- B. Minimum 16 Year of Education in Relevant Field (IT and Computer Skills will be preferred)

Recommended trainer: trainee ratio

The recommended maximum trainer: trainee ratio for this program is 1 trainer for 25 trainees.

Medium of instruction i.e. language of instruction:

Instructions will be in Urdu/ English/ Local language.

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Duration of the course (Total time, Theory & Practical time):

The distribution of contact hours is given below:

Total - 600 hours
Theory - 120 hours
(20%) Practical - 480 hours
(80%) Proposed Course Duration-
6 Months

Sequence of modules:

Module-1 Follow Safety Rules at Site	Module-5 Perform Basic Bench Work operations	Module-8 Interpret Mineral Map
Module-2 Perform Basic Communication Skills		Module-9 Perform Basic Electricity Applications
Module-3 Demonstrate Basic Numeracy Skills	Module-6 Interpret Topographic Map	Module-10 Perform Safe Handling of Explosive Material
Module-4 Perform Basic Technical Drawings	Module-7 Interpret Geological Maps	

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Summary template-overview of the curriculum:

Following is the structure of the course:

Sr. No	Code	Competency Standards	Occupation	NVQF Level	Category	Estimated Contact Hours			Cr Hr
						Th.	Pr	Total	
Assistant Technician for Mining Process Technology Level-2									
1	724MP12A	Follow Safety Rules at Site	Assistant Technician	2	Generic	9	21	30	3
2	724MP12B	Perform Basic Communication Skills		2	Generic	9	21	30	3
3	724MP12C	Demonstrate Basic Numeracy skills		2	Functional	18	42	60	6
4	724MP12D	Perform BasicTechnical Drawing		2	Functional	23	57	80	8
5	724MP12E	Perform Basic Bench Work Operations		2	Technical	10	90	100	10
6	724MP12F	Interpret Topographic Map		2	Technical	7	33	40	4

**National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)**

7	724MP12G	Interpret Geological Maps		2	Technical	6	24	30	3
8	724MP12H	Interpret Mineral Map		2	Technical	6	24	30	3
9	724MP12I	Perform Basic Electricity Applications		2	Technical	16	84	100	10
10	724MP12J	Perform Safe Handling of Explosive Material		2	Technical	16	84	100	10
Total						120	480	600	60
Percentage						20	80		

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Summary – overview of the curriculum

Module Title and Aim	Learning Units	Theory Days/hours	Workplace Days/hours	Timeframe of modules
Module 1: Follow Safety Rules at Site Aim: After successful completion of this module, the trainee is competent in Following of Safety Rules at Site	LU1: Maintain occupational safety and health at workplace LU2: USE Personal Protective and Safety Equipment (PPE) LU3: Perform Communication Signals LU4: Demonstrate Firefighting exercise LU5: Perform basic rescue/first aid in case of emergency LU6: Understand basic safety protocols of blasting	9	21	30
Module 2: Perform Basic Communication Skills Aim: After successful completion of this module, the trainee is competent in performing basic communication skills	LU1: Communicate in a Team LU2: Follow Supervisor's instructions as per Organizational SOPs LU3: Report hazard/incident properly	9	21	30

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module Title and Aim	Learning Units	Theory Days/hours	Workplace Days/hours	Timeframe of modules
Module 3: Demonstrate Basic Numeracy Skills Aim: After successful completion of this module, the trainee is competent in demonstrating basic numeracy skills	LU1: Apply Basic Numeracy Skills LU2: Perform Basic Measurement LU3: Estimate Area and Volume of Object	18	42	60
Module 4: Perform Basic Technical Drawing Aim: After successful completion of this module, the trainee is competent in performing basic technical drawing	LU1: Explore Lettering, Lines and symbols LU2: Draw Different Geometrical Shapes LU3: Dimension the drawing	23	57	80

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module Title and Aim	Learning Units	Theory Days/hours	Workplace Days/hours	Timeframe of modules
Module 5: Perform Basic Bench Work operations at Workplace Aim: After successful completion of this module, the trainee is competent in performing basic computer operations	LU1: Assist in Drilling Operation LU2: Assist Counter Sinking and Counter Boring LU3: Carry out Reaming LU4 : Perform General Housekeeping & Maintenance LU5: Perform Benchmark Operation for charge preparation	10	90	100
Module 6: Interpret Topographic Map Aim: After successful completion of this module, the trainee is competent in interpreting Topographic Map	LU1: Utilize Grid Reference and GPS LU2: Illustrate Administrative Index LU3: Locate The Specific/Required Area In Sheet LU4: Setout Legends of Topographic Sheet	7	33	40

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module Title and Aim	Learning Units	Theory Days/hours	Workplace Days/hours	Timeframe of modules
Module 7: Interpret Geological Maps Aim: After successful completion of this module, the trainee is competent in interpreting Geological Maps	LU1: Illustrate Rock units LU2: Recognize geological structure LU3: Illustrate legends LU4: Identify Geological map symbols	6	24	30
Module 8: Interpret Mineral Map Aim: After successful completion of this module, the trainee is competent in interpreting Mineral Map	LU1 Identify mineral zones LU2: Identify different minerals LU3: Identify gemstone	6	24	30

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module Title and Aim	Learning Units	Theory Days/hours	Workplace Days/hours	Timeframe of modules
Module 9: Perform Basic Electricity Applications Aim: After successful completion of this module, the trainee is competent in performing basic electricity applications	LU1: Interpret Electrical layout LU2: Perform Basic Electric Circuits LU3: Perform Basic Electrical Measurements LU4: Assist in Establishing three phase connection	16	84	100
Module 10: Perform Safe Handling of Explosive Material Aim: After successful completion of this module, the trainee is competent in performing safe handling of explosive material	LU1: Identify different types of blasting materials LU2: Perform safe storage of Blasting Material LU3: Perform safe handling of explosive materials after transportation LU4: Use explosive material safely	16	84	100

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module 1: Follow Safety Rules at site

Objective: The aim of this module to get knowledge, skills and understanding to follow safety rules at site.

Duration: 30Hours

Theory: 9 Hours

Practice: 21 Hours

Credit Hours: 3

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU1: Maintain occupational safety and health at workplace	The trainee will be able to: - Identify the safety signs and symbols - Erect barricades, hoardings, signage in the hazardous areas - Maintain housekeeping - Report unsafe condition to	- Knowledge of different types of hazards - Explain unsafe working conditions - Understanding of health and safety signs and symbols - Explain housekeeping - Understanding of different methods of dealing with hazard Activity:	Total 4.5hrs Theory: 1.5 hrs Practical: 3 hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White Board - Marker Non Consumable - White board - Multimedia	- Class Room - Simulated environment

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

	immediate supervisor (shift person)

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
				Safety manuals	
LU4: Demonstrate Firefighting exercise	The trainee will be able to: - Identify fire types and extinguishers - Perform fire alarm response procedure - Operate fire extinguishers safely - Use firefighting protective equipment (PPE)	- Explain the importance Firefighting - Describe types of fires Activity: Practice Firefighting exercise	Total 4.5hrs Theory: 1.5 hrs Practical: 3 hrs	Consumable - Notebooks - Pencils - Erasers - Fire extinguisher - Sharpeners Non Consumable - White board - Multimedia - Internet - Computer system	- Class Room - Simulated environment

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

LU5: Perform basic rescue/first aid in case of emergency	The trainee will be able to: • Check and maintain first aid box essentials • Assess emergency situation and ensure scene safety • Perform CPR on a man (for demonstration) • Apply dressings and bandages properly • Perform safe lifting and moving techniques (stretcher use)	• Explain the importance of rescue and first aid • Describe types of fires Activity: Practice rescue exercise	Total 4.5hrs Theory: 1.5 hrs Practical: 3 hrs	Consumable • Notebooks • Pencils • Erasers • Fire extinguisher • Sharpeners Non Consumable • White board • Multimedia First Aid Kit	• Class Room • Simulated environment
--	---	--	---	--	---

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

LU6: Understand basic safety protocols of blasting	The trainee will be able to: • Recognize types and purposes of blasting • Recognize safety signage and warning signals • Identify required PPE • Recognize Non sparking tools • Use of specified equipment's	• Basic first aid treatment • Safety signs and symbols • Usage of Appropriate PPE for different situations • Understanding of blasting types, safety signals, required PPE, non-sparking tools, and proper use of specified blasting equipment.	Total 4.5hrs Theory: 1.5 hrs Practical: 3 hrs	• Notebooks • Pencils • Erasers • Fire extinguisher • Sharpeners - Non Consumable • White board • Multimedia • First Aid Kit	• Class Room • Simulated environment
---	--	--	---	--	---

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module 2: Perform Basic Communication Skills

Objective of the module: The aim of this module to get knowledge, skills and understanding to perform basic communication.

Duration: 30 Hours

Theory: 9 Hours

Practice: 21 Hours

Credit Hours: 3

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU1. Demonstrate the basic communication skills	The trainee will be able to: • Demonstrate the listening skills • Demonstrate the reading skills • Demonstrate the writing skills • Demonstrate the speaking skills	• Knowledge of communication skills (7Cs of effective communication) • Describe verbal and non-verbal communication • Explain reporting techniques Activity: • Practice to listen to the audio and write down • Practice to note down the instructions given by the supervisor	Total: 10 hrs Theory: 3hrs Practical: 7hrs	Consumable • Notebooks • Pencils • Erasers • Sharpeners • White board marker Non Consumable • White board	• Class Room

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU2. Follow Supervisor's instructions	The trainee will be able to: - Carry out the instructions of the supervisor - Report to the supervisor as per organizational SOP's given standards	- Explain the note taking procedure - Understanding of the standard procedure to prepare the report Activity: - Prepare different office reports	Total: 10 hrs Theory: 3hrs Practical: 7hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker Non Consumable - White board	Class Room

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

LU3. Report hazard/incident properly	The trainee will be able to: - Identify and recognize hazards or incidents - Record incident details accurately - Notify the appropriate person to report	Activity: Prepare hazard reports	Total: 10 hrs Theory: 3hrs Practical: 7hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker Non Consumable - White board	- Class Room - Workplace
--	--	---	---	---	---

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module 3: Demonstrate Basic Numeracy Skills

Objective of the module: The aim of this module is to get knowledge, skills and understanding to demonstrate basic numeracy skills

Duration: 60 Hours

Theory: 18 Hours

Practice: 42Hours

Credit Hours: 6

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU1:Apply Basic Numeracy Skills	The trainee will be able to: 1. Perform basic mathematical calculations as per given task 2. Perform DMAS rule as per given calculation. 3. Calculate percentages of given task	• Understanding of basic principles of addition, subtraction, multiplication division of whole number and fraction • Explain how to calculate percentage • Knowledge of DMAS rule Activity: • Practice of addition, subtraction, multiplication division of whole number and fraction • Practice to calculate	Total: 10hrs. Theory: 2 hrs. Practical: 8hrs.	Consumable • Notebooks • Pencils • Erasers • Sharpeners • Pen • White board marker Non Consumable • White board	• Class Room

Module 6- Interpret Topographic Map

Objective of the module: The aim of this module is to get knowledge, skills and understanding to interpret topographic map.

Duration: 40Hours

Theory: 07Hours

Practice: 33 Hours

Credit Hours: 4

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU1. Utilize Grid Reference and GPS	Trainee will be able to: - Identify the longitude and latitude of given location - Use GPS - Use Brunton compass to find direction - Identify the number of topographic sheet - Scale of topographic sheet as per requirements - Identify the values of longitude and latitude of given site	- Definition of longitude and latitude of location - Definition of GPS - Definition of Brunton compass - Explanation of topography - How to measure distance between two specific points of topographic region Activity: - Reading map as per GPS reference location	Theory- 2Hrs Practical- 9Hrs Total- 11Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker - Duster Non Consumable - White board - Multimedia - Internet - Computer system - Topographic sheet - GPS - Brunton compass	Class Room

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
	Measure distance between two specific points on topographic sheet	- Find direction by using Brunton compass - Calculate longitude and latitude of given site - Measure distance between two specific points on topographic sheet <u>Activity</u> - Reading map as per GPS reference location - Find direction by using Brunton compass - Calculate longitude and latitude of given site - Measure distance between two specific points on topographic sheet		Plain table	

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU2. Illustrate Administrative Index	Trainee will be able to: - Identify geographical location of topographic sheet - Identify number of adjacent topographic sheet	Define geographical location of topographic sheet Activity: - Identify manmade and natural features on topographic sheets - Identify geographical boundaries of different administrative zones on topographic sheets	Theory- 2Hrs Practical- 9Hrs Total-11Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker - Duster Non Consumable - White board - Multimedia - Internet - Computer system - Topographic sheet - GPS - Brunton compasses - Plain table	Class Room

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

LU3. Locate Specific/Required Area In Sheet	- Calculate area of ore body on topographic sheet - Calculate mining area of required location	- Describe method of calculate area of ore body - Describe method of calculate mining area Activity - Practice to calculate area of ore body on topographic sheet - Practice to calculate mining area of required location - Practice to plan accessibility of far off mines using topographic sheets	Theory-1Hrs Practical-6Hrs Total-7Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker - Duster Non Consumable - White board - Multimedia - Internet - Computer system - Topographic sheet - GPS - Brunton compass - Plain table	Class Room
--	---	--	---	--	-------------------

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU4. Setout Legends of Topographic Sheet	- Identify the natural and man- made features on topographic sheet - Identify water bodies, vegetation cover, agricultural land, mountainous and plain area - Identify man- made structures (roads, railway lines, towns etc.) - Identify the landforms by reading contours	- Knowledge of natural and manmade features on topographic sheet - Understanding of water bodies Activity: - Practice to identify landforms by reading contours - Practice to identify geomorphologic features on topographic sheets	Theory-2Hrs Practical- 9Hrs Total-11Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker - Duster Non Consumable - White board - Multimedia - Internet - Computer system - Topographic sheet - GPS - Brunton compass - Plain table	Class Room

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module7- Interpret Geological Maps

Objective of the module: The aim of this module to get knowledge, skills and understanding to interpret geological maps.

Duration: 30 Hours

Theory: 06 Hours

Practice: 24Hours

Credit Hours: 3

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU1. Illustrate Rock units	Trainee will be able to: - Find out geological formation of given rock - Recognize age of given rock - Understand dip and strike - Understand type of lithology (limestone, sandstone, shale etc.) - Understand boundaries of different rock units.	- Knowledge of geological formation of rock - Define the terms dip and strike - Describe lithology Activity: - Practice to find out geological formation of given rock - Practice to recognize age of given rock - Practice to understand dip and strike	Theory-2Hrs Practical-6Hrs Total-8Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker - Duster - Rebars - Chalk Non Consumable - White board - Multimedia - Internet - Computer	Class Room

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
		- Practice to understand type of lithology - Practice to understand boundaries of different rock units		- system - Geological map - Plain table	
LU2. Recognize geological structure	Trainee will be able to: - Illustrate Fold - Identify faults (reverse, normal, strike-slip) - Identify joints - Identify foliation and lineation - Understand anticline syncline - Learn about unconformity	- Knowledge of fold and fault symbol - Knowledge of foliation and lineation - Describe anticline and syncline - Understanding of unconformity Activity: - Practice to identify fold, faults and joints - Practice to identify foliation and lineation - Practice to identify anticline and	Theory-2Hrs Practical-6Hrs Total-8Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpener - White board marker - Duster - Rebars - Chalk Non Consumable - White board - Multimedia - Internet - Computer system	Class Room

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
		syncline		- Geologic al map - Plain table	
LU3. Illustrate legends	Trainee will be able to: - Identify Formation legend - Identify structure legend - Understand lithology legend	- Understanding of formation legend - Describe identification of structure legend - Knowledge of lithology legend <u>Activity</u> - Practice to identify Formation and structure legend - Practice to identify lithology legend	Theory- 1Hrs Practical- 6Hrs Total- 07Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker - Duster - Rebars - Chalk Non Consumable - White board - Multimedia - Internet - Computer system - Geologic al map	Class Room

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
				Plain table	
LU4. Identify Geological map symbols	Trainee will be able to: - Learn dip and strike symbol - Identify unconformity symbol - Identify fold and fault symbols	- Explain dip and strike symbol - Knowledge of unconformity symbol - Understanding of fold and fault symbol Activity - Practice to calculate dip and strike symbol - Practice to identify unconformity, fold and fault symbols	Theory-1Hrs Practical-06Hrs Total-07Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker - Duster - Rebars - Chalk Non Consumable - White board - Multimedia - Internet - Computer system - Geological map - Plain table	Class Room

Objective: This competency standard covers the skills and knowledge required to interpret mineral map.

Duration: 30Hours

Theory: 06Hours

Practice: 24Hours

Credit Hours: 3

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU1. Identify mineral zones	Trainee will be able to: - Understand Sedimentary area - Recognize Igneous area - Recognize Metamorphic area	- Knowledge of sedimentary and igneous rock - Understanding of metamorphic area <u>Activity:</u> - Practice to understand sedimentary, igneous and metamorphic area - Practice to identify hardness of different rocks using Moho's hardness scale	Theory-02Hrs Practical-08Hrs Total-10Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker - Duster - Rebars - Chalk Non Consumable - White board - Multimedia - Internet - Computer system - Mineral maps	Class Room /Lab/ Field Visit

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

				• Moho's hardness tester • XRF handheld gun	
LU2. Identify different minerals	Trainee will be able to: • Identify sulphide and oxide minerals according to rock form • Recognize carbonates • Recognize silicates • Phosphates • Highlight Native elements (gold, silver etc.)	• Understanding of sulphide and oxide minerals • Knowledge of carbonates, silicates and phosphate from rocks Activity: • Practice to identify sulphide, oxide, carbonates Silicates, phosphates and native elements	Theory-02Hrs Practical-08Hrs Total-10Hrs	Consumable • Notebooks • Pencils • Erasers • Sharpeners • Whiteboard marker • Duster • Chalk • Rebars Nonconsumable • White board • Multimedia • PPEs • Computer • Mineral maps • Moho's hardness tester • XRF handheld	Class Room Training Workshop Lab/ Field Visit

***National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)***

				gun • Plain table	
--	--	--	--	--	--

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

LU3. Identify gemstone	Trainee will be able to: - Recognize emerald, topaz, ruby, sapphire etc. - Estimate the hardness of gemstone	- Understanding of emerald, topaz, ruby and sapphire - Describe the method of estimation the hardness of gemstone <u>Activity:</u> - Practice to identify emerald, topaz, ruby, sapphire etc. - Practice to estimate the hardness of gemstone	Theory-02Hrs Practical- 08Hrs Total-10Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - White board marker - Duster - Rebars - Chalk Non Consumable - White board - Multimedia - Internet - Computer system - Mineral maps - Moh's hardness tester - XRF handheld gun - Plain table	
---	---	---	---	---	--

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module 9- Perform Basic Electricity Applications

Objective: The aim of this module is to get knowledge, skills and understanding to perform basic electricity applications.

Duration: 100 Hours

Theory: 16 Hours

Practice: 84 Hours

Credit Hours: 10

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU1. Interpret Electrical layout	Trainee will be able to: - Interpret layout of the job for installations - Interpret electrical drawing for electrical wirings - Connect components of equipment according to drawing	- Illustrate electrical symbols to be used in drawings - State different type of electrical wire gauges and insulation. - Elaborate AC and DC Current - Describe Ohm's Law and Kirchhoff Law. - Explain electrical circuit diagram	Theory-04Hrs Practical-18Hrs Total-22Hrs	Consumable - Notebooks - Pencils - Insulation tape - Electrical wire of different color code and gauges - White board marker Non Consumable	Class Room/workshop

***National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)***

		• Explain layout of electrical components in circuit diagram <u>Activity:</u> • Practice to interpret electrical circuit diagram and layout of the job. • Practice of connecting electrical components as per circuit diagram		• White board • PPES • Multimedia • Internet • Computer system • Electrical Circuit Board • Multi meter • Wire cutter • Wire clipper • Continuity tester	
--	--	---	--	--	--

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

LU2.	Trainee will be able to:			Consumable	Class
Perform Basic Electric Circuits	• Prepare series circuit on work bench • Prepare parallel circuit on work bench • Prepare Head and Tail Light	• Describe electrical connection scheme of the job • Elaborate handling techniques for placement	Theory-04-Hrs Practical-21-Hrs Total- 25 Hrs	• Notebooks • Pencils • Insulation tape • Electrical wire of different color code and	Room/workshop

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

	Circuit on work bench • Prepare indicator circuit on work bench	• for electrical equipment • Describe parallel and series circuit. <u>Activity:</u> • Practice of performing electrical measurement and prepare series and parallel electrical circuit according to diagram • Practice to prepare head and tail light circuit on work bench • Practice to prepare indicator circuit on work bench		• gauge • Cable clips • Spring push connectors Non Consumable • White board • PPES • Multimedia • Internet • Computer system • Electrical Circuit Board • Multi meter • Wire cutter • Wire clipper	
--	--	--	--	---	--

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

LU3. Perform Basic Electrical Measurements	Trainee will be able to: • Measure voltage • Measure current • Measure resistance • Test continuity	• Describe Voltage, Current, Resistance and Continuity of current • Differentiate between earthing and testing procedures • Elaborate working principle of earth tester • Elaborate L.C.R meter <u>Activity:</u> • Practice to measure Voltage, Current, Resistance and Continuity in circuit	Theory-04-Hrs Practical-21-Hrs Total- 25 Hrs	Consumable • Notebooks • Pencils • Insulation tape • Electrical wire of different color code and gauge • White board marker Non Consumable • PPES • Multimedia • Internet • Computer system • Electrical Circuit Board	Class Room/workshop
---	---	--	--	--	----------------------------

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

				• Multi meter • Wire cutter • Wire clipper • Continuity tester	
LU4. Assist in establishing three phase connection	Trainee will be able to: • Assist in cable gauge selection • Assist in cables colors selection • Assist in Connecting cables • Insulate Joints	• Elaborate methods of installing the electrical appliances. • Describe different methods of cable testing • Describe different types of coding procedures (e.g. color coding / tagging / numbering) Activity: • Practice of power supply connection to the three phase motor as per circuit diagram	Theory-04-Hrs Practical-24-Hrs Hrs Total- 28 Hrs	Consumable • Notebooks • Pencils • Erasers • Sharpeners • Whiteboard marker • Duster • Chalk • Spacers Non Consumable • White board • Multimedia • PPEs • Computer	Class Room/ Workshop

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

Module 10- Perform Safe Handling of Explosive Material

Objective: The aim of this module to get knowledge, skills and understanding to perform safe handling of explosive material.

Duration: 100Hours

Theory: 16Hours

Practice: 84 Hours

Credit Hours: 10

Learning Unit	Learning Outcomes	Learning Elements	Duration	Materials Required	Learning Place
LU1. Identify different types of blasting materials	Trainee will be able to: - Keep detonator/primer and blasting material separately while transferring as per SOP - Keep electrostatic charge to be dissipated - Maintain appropriate distance between blasting and flammable material	- Knowledge of detonator and blasting materials - Understanding of electrostatic charge Activity: - Practice to follow SOPs for keeping detonator/primer and blasting material separate while transferring - Prepare Head and Tail	Theory-4Hrs Practical-21Hrs Total-25Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - Whiteboard marker - Duster Non Consumable - White board - Multimedia - Computer - PPEs - Transportation	Class Room Training Workshop Lab/ Field Visit

***National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)***

Light

Circuit on workbench
using

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

		appropriate tools. • Prepare indicator circuit on workbench using appropriate tools		and storage machines • Blasting material	
LU2. Perform safe storage of Blasting Material	Trainee will be able to: • Store all blasting material away from populated area under surveillance • Storage room should keep away from electric wires and metallic materials.	• Knowledge of different blasting materials • Define blasting materials Activity: • Practice to safe storage of blasting material • Practice to perform safe blasting activity	Theory-4Hrs Practical- 21Hrs Total- 25Hrs	Consumable • Notebooks • Pencils • Erasers • Sharpeners • Whiteboard marker • Duster Non Consumable • White board • Multimedia • PPEs • Transportation and storage machines • Blasting material	Class Room Training Workshop

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

LU3. Perform safe handling of explosive materials after transportation	Trainee will be able to: - Inspect seal package of explosive and accessories - Perform safe transportation of explosives and accessories through approved explosives vans - Maintain separation of explosives and accessories	Knowledge: - Understanding of Safety Standards for handling, transporting, and storing explosives and accessories. - Ability to Inspect and Verify the condition and integrity of explosive packaging before use. - Knowledge of Legal and Regulatory Requirements for transporting explosives using approved vans. - Awareness of Proper Storage Protocols, including the separation of explosives and accessories to prevent accidents. - Competence in Risk Assessment and Mitigation during explosive handling operations. Activity: - Inspect sealed explosive and accessory packages	Theory-4Hrs Practical-21Hrs Total-25Hrs	Consumable - Notebooks - Pencils - Erasers - Sharpeners - Whiteboard marker - Duster Non Consumable - White board - Multimedia - PPEs - Transportation and storage machines - Blasting material	Lab/ Field Visit
--	---	--	---	--	--------------------------------

***National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)***

		for damage or tampering. • Demonstrate safe loading and transport using a mock or approved explosives van. • Arrange explosives and accessories in storage with proper separation. • Follow safety protocols and legal transport guidelines. • Discuss hazards and risk mitigation measures in handling explosives.			
--	--	--	--	--	--

National Vocational Certificate Level 2 in Mining Process Technology (Assistant Technician)

LU4: Use explosive materials safely	Trainee will be able to: • Use required PPE • Keep clear from blasting zone as per supervisor instructions • Assist in preparing work area to prevent accidents	Knowledge: • Knowledge of appropriate PPE for blasting activities. • Awareness of safety zones and following supervisor instructions. • Skills to assist in hazard prevention by preparing the work area safely. Activity: • Wear required PPE before entering the site. • Follow supervisor's instructions to stay clear of the blasting zone. • Help prepare the work area to avoid accidents.	Theory-4Hrs Practical-21Hrs Total-25Hrs	Consumable • Notebooks • Pencils • Erasers • Sharpeners • Whiteboard marker • Duster Non Consumable • White board • Multimedia • PPEs • Transportation and storage machines • Blasting material	Class Room Training Workshop/Lab /Field Visit
---	---	--	---	--	---

List of Tool, Machinery, Equipment and Consumables:

SR#	Items/Tools /Equipment & Consumables
1.	PPEs: Safety Helmet Safety Shoes Earmuffs Gloves Goggles Face Shields. Surgical Face Masks
2.	Computer Systems
3.	Scanner
4.	Printer
5.	Drilling machine with accessories

***National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)***

6.	Drilling tools (twist drill, center drill, counter boring tool , reamer, taps etc)
7.	Surface Grinding Machine with accessories and consumables
8.	Steel Rules
9.	Tri Square
10.	Vernier Caliper
11.	Thread gauges
12.	Screw pitch gauges
13.	Fillet gauges
14.	Feeler gauges
15.	Set of Adjustable Wrench
16.	Set of Spanners (Open end, Ring)
17.	Pipe wrench
18.	L-key sets

***National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)***

19.	Nose pliers
20.	Grip pliers
21.	Straight peen Hammer
22.	Long nose Tong
23.	Short nose tong
24.	Flat Chisel
25.	Scraper of different shapes
26.	scriber
27.	Hand hacksaw
28.	Diamond hand file set
29.	Rifle hand file set
30.	Needle hand file set
31.	Round hand file

***National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)***

32.	Half round hand file
33.	Triangular hand file
34.	Square hand file
35.	Flat hand file
36.	Drawing board
37.	Mineral maps
38.	Moh's hardness tester
39.	XRF handheld gun
40.	Plain table
41.	Stationary items
42.	Transportation and storage machines
43.	Multimeter
44.	Wires

***National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)***

45.	Measuring tools
46.	Tester
47.	Topographic sheet
48.	Brunton compass
49.	GPS
50.	Graph and drawing sheet
51.	Geometry Box
52.	T-Square
53.	Set Square
54.	Templates
55.	Compass
56.	Divider
57.	Drawing pencils

***National Vocational Certificate Level 2 in Mining Process Technology
(Assistant Technician)***

58.	Protractor
59.	Measuring tapes
60.	Calculator
61.	Materials of various Types
62.	First Aid Box
63.	Oxygen Cylinder
64.	Safety sign boards
